SafeDrive MiniDVR

The SafeDrive MiniDVR™ mobile digital video recorder (MDVR) system with two integrated cameras installs directly to the windshield, securely and permanently. The system captures video of road and cabin, with both a forward-facing and an interior-facing camera. With its compact size and mounting versatility, this reasonably priced, feature-rich MDVR is adaptable to any vehicle in your fleet.

Recording is triggered in the event of a crash; when the vehicle's operator is speeding or driving erratically; or when the driver manually triggers the event button

Battery backup ensures events are recorded even with a loss of power
The system's post-event snapshot feature allows recording to continue while video is downloading to the CompactFlash® card

SafeDrive records global positioning system (GPS) time and date, vehicle speed, longitude and latitude, and x- and y-axis G-force data synchronized with the video and audio

The MDVR can be installed permanently to a windshield with an included bracket, or for temporary use with custom SafeDrive MiniDVR™ suction cups

Limited One-Year New Product Warranty
