

Mining Support Equipment Solutions

AUTOMATIC ELEVATING TAILGATES

MAXTER

A New Force in the Mining Industry

AUTOMATIC ELEVATING TAILGATES

Features:

- Rugged design
- Maxter proven concept, in operations for decades
- Automatic Elevating without need for hydraulics
- Wear resistant
- Easy installation / servicing

Install one of our tailgates to:

- Permit full load of the vehicle
- Improve weight distribution
- Prevent spillage
- Increase tire life
- Lower cost-per-ton

Benefits

- Reduce "Total Cost of Ownership"
- Quick return on investment (ROI)
- Best Production/cost ratio of the industry
- Reliable, long lasting, proven design

Advantages

The tailgate permits full loading of the vehicle assuring better weight distribution. Tailgates can reduce material spillage particularly while climbing grades, thus keeping haul roads free of debris. This can reduce tire damage and premature replacement. Tailgates increase payload capacity therefore lowering your cost per ton.

Our tailgates are available for most makes and models of trucks. We can custom design to meet your special requirements.

Automatic elevating tailgates are ideal for the mining and construction industry. Custom designed to fit on any makes and models of rigid frame and articulated off highway truck bodies.

Learn more about how our tailgates can benefit your company. We can reduce your costs in the most efficient way, by supplying quality products and service.

MINING INDUSTRY

MAXTER
A MECFOR PRODUCT

Mecfor Inc.

Manufacturer specialized in the development, design, production and implementation of new products in the mining and quarries sectors. With many years of expertise and experience on our side, we carry out turnkey projects, involving, design, engineering, manufacturing, on-site delivery and product support.

In addition to its rock and water spreading system, Mecfor offers a complete range of products and services for the mining sector. We design and manufacture new products, specialized trailers, truck custom bodies, water tanks and other specialized equipment. Note that Mecfor uses finite-element analysis to optimize its products while minimizing costs.

Mecfor is a renowned manufacturer of heavy mobile equipment, originally specialized in the design of aluminium mills production equipment. In recent years, Mecfor has made its way into the mining market by introducing its line of rock and water spreading systems along with its 60 to 500-ton specialized trailers.

Mecfor goes even further by presenting the prestigious Maxter product line. For more than 50 years, Maxter has built a solid reputation as a reliable supplier of mining support equipment with products such as custom dump bodies, automatic elevating tailgates and extensions for rigid frame and articulated trucks, off highway bottom dump, rear dump and coal hauling trailers fitted to both rigid frame and articulated trucks. Maxter innovative products have won many awards over the

years and remains a strong player in the industry.

The experience, reliability and professionalism of the Mecfor team combined with the expertise and quality of Maxter's products guarantees the delivery of the most cost effective solutions for the mining industry.

Mecfor's Product Support

A Team of Experts

For many years Mecfor has been working with highly demanding customers. A long time ago Mecfor understood that respecting the delivery delays is critical for an operation. We promise "on time" deliveries, every time.

We also know that a mine or a construction site should not reduce its production because of equipment downtime. That is why we have an experienced team of experts to support you.

The Mecfor product support team will work with your maintenance team to reduce downtime, improve reliability, maximize productivity and prevent equipment breakage. Our team will train your operators and maintenance crew to facilitate operation and limit maintenance interventions.

Available Parts and service

Mecfor will work with your people so that the parts critical to the operation will be maintained in inventory, available for quick

interventions. In case of problems our skilled technicians will also be quickly on site to diagnose the situation and correct it as fast as possible to be sure that your equipment is going back to production.

On Site Commissioning and Training

Once your equipment is on site, Mecfor will assist you to confirm a proper installation and a trouble free operation. At the same time, Mecfor will give the appropriate training to your operation and maintenance team.

Mecfor's Warranty

Mecfor offers a twelve (12) months or 2000 hours of operation limited warranty on parts and service. For more details on the warranty application, contact our experts.

Mecfor's Quality

For years Mecfor has been delivering products all over the world. All our products are designed and manufactured in accordance with the more stringent quality standards. Everything is done under the ISO 9001 standards. Our welders are qualified under the CWB (Canadian Welding Bureau) standards.
